Introduction

The Wonder Learning Partnership has a duty to ensure arrangements are in place to support pupils with medical conditions. The aim of this policy is to ensure that all pupils with medical conditions, in terms of both physical and mental health, receive appropriate support to allow them to play a full and active role in school life, remain healthy, have full access to education (including school trips and PE), and achieve their academic potential.

The trust believes it is important that parents of pupils with medical conditions feel confident that the school provides effective support for their children's medical conditions, and that pupils feel safe in school.

Some pupils with medical conditions may be classed as disabled under the definition set out in the Equality Act 2010. The school has a duty to comply with the Act in all such cases.

In addition, some pupils with medical conditions may also have SEND and have an EHC plan collating their health, social and SEND provision. For these pupils, the school's compliance with the DfE's 'Special educational needs and disability code of practice: 0 to 25 years' and the school's Special Educational Needs and Disabilities (SEND) Policy will ensure compliance with legal duties.

To ensure that the needs of our pupils with medical conditions are fully understood and effectively supported, we consult with health and social care professionals, pupils, and their parents.

Roles and Responsibilities

Under the Equalities Act 2010, Trust schools and settings should be making reasonable adjustments for disabled children, including those with medical needs, and are under a duty to plan strategically to increase access over time. Trust schools and settings should consider what reasonable adjustments they need to make to enable children with medical needs to participate fully in all areas of school life, including educational visits and sporting activities.

The Headteacher or designated member of staff, in consultation with Trustees, Governing Committee, staff, parents/guardians, health professionals and (if appropriate) the local authority, is responsible for deciding whether the Trust/School can assist a child with medical needs.

The Board of Trustees is responsible for:

- Fulfilling its statutory duties under legislation.
- Ensuring that arrangements are in place to support pupils with medical conditions.
- Ensuring that pupils with medical conditions can access and enjoy the same opportunities as any other pupil at the school.
- Working with the LA, health professionals, commissioners, and support services to ensure that pupils with medical conditions receive a full education.
- Ensuring that, following long-term or frequent absence, pupils with medical

conditions are reintegrated effectively.

- Ensuring that the focus is on the needs of each pupil and what support is required to support their individual needs.
- Instilling confidence in parents and pupils in the school's ability to provide effective support.
- Ensuring that all members of staff are properly trained to provide the necessary support and are able to access information and other teaching support materials as needed.
- Ensuring that no prospective pupils are denied admission to the school because arrangements for their medical conditions have not been made.
- Ensuring that pupils' health is not put at unnecessary risk. As a result, the board holds the right to not accept a pupil into school at times where it would be detrimental to the health of that pupil or others to do so, such as where the child has an infectious disease.
- Ensuring that policies, plans, procedures, and systems are properly and effectively implemented.

The Headteacher or designated member of staff is responsible for:

- The overall implementation of this policy.
- Ensuring that this policy is effectively implemented with stakeholders.
- Ensuring that all staff are aware of this policy and understand their role in its implementation.
- Ensuring that a sufficient number of staff are trained and available to implement this policy and deliver against all IHPs, including in emergency situations.
- Considering recruitment needs for the specific purpose of ensuring pupils with medical conditions are properly supported.
- Having overall responsibility for the development of Individual Health Plans (IHPs).
- Ensuring that staff are appropriately insured and aware of the insurance arrangements.
- Contacting the school nurse where a pupil with a medical condition requires support that has not yet been identified.

It is good practice that staff, including supply staff should always be informed of a child's medical needs where this is relevant and of any changes to their needs as and when they might arise. All staff will be informed of the designated person with responsibility for medical care. A list of medical needs must be clearly known and accessible in order to support the child's day to day care.

Parents and Guardians are responsible for:

- Notifying the school if their child has a medical condition.
- Providing the school with sufficient and up-to-date information about their child's medical needs to include:
 - Details of pupil's medical needs.
 - Providing medication, that has not passed its expiry date.
 - Providing information on possible side effects of prescribed medication.

- Allergies.
- Name of GP/consultants.
- Special requirements e.g. dietary needs, pre-activity precautions.
Parents/guardians may be required to provide evidence in this case.
- What to do and who to contact in an emergency.
- Cultural and religious views regarding medical care.
- Being involved in the development and review of their child's IHP.
- Carrying out any agreed actions contained in the IHP.
- Ensuring that they, or another nominated adult, are contactable at all times.
- provide any medication to the (schools designated area) in a container clearly labelled with the following:
 - the child's name.
 - the child's year group and form (where appropriate).
 - name of medicine.
 - dose and frequency of medication.
 - special storage arrangements.
 - collect and dispose of any medicines held in school at the end of each term.

Pupils are responsible for:

- Being fully involved in discussions about their medical support needs, where applicable.
- Contributing to the development of their IHP, if they have one, where applicable.
- Being sensitive to the needs of pupils with medical conditions.

School staff are responsible for:

- Providing support to pupils with medical conditions, where requested, including the administering of medicines, but are not required to do so.
- Taking into account the needs of pupils with medical conditions in their lessons when deciding whether or not to volunteer to administer medication.
- Receiving sufficient training and achieve the required level of competency before taking responsibility for supporting pupils with medical conditions.
- Knowing what to do and responding accordingly when they become aware that a pupil with a medical condition needs help.

The school nurse is responsible for:

- Notifying the school at the earliest opportunity when a pupil has been identified as having a medical condition which requires support in school.
- Supporting staff to implement IHPs and providing advice and training.
- Liaising with lead clinicians locally on appropriate support for pupils with medical conditions.

Clinical commissioning groups (CCGs) are responsible for:

- Ensuring that commissioning is responsive to pupils' needs, and that health services are able to cooperate with schools supporting pupils with medical conditions.
- Making joint commissioning arrangements for EHC provision for pupils with SEND.
- Being responsive to LAs and schools looking to improve links between health

services and schools.

- Providing clinical support for pupils who have long-term conditions and disabilities.
- Ensuring that commissioning arrangements provide the necessary ongoing support essential to ensuring the safety of vulnerable pupils.

Other healthcare professionals, including GPs and paediatricians, are responsible for:

- Notifying the school nurse when a child has been identified as having a medical condition that will require support at school.
- Providing advice on developing IHPs.
- Providing support in the school for children with particular conditions, e.g. asthma, diabetes, and epilepsy, where required.

Providers of health services are responsible for cooperating with the school, including ensuring communication takes place, liaising with the school nurse and other healthcare professionals, and participating in local outreach training.

The LA is responsible for:

- Commissioning school nurses for local schools.
- Promoting cooperation between relevant partners.
- Making joint commissioning arrangements for EHC provision for pupils with SEND.
- Providing support, advice, guidance, and suitable training for school staff, ensuring that IHPs can be effectively delivered.
- Working with the school to ensure that pupils with medical conditions can attend school full-time.

Where a pupil is away from school for 15 days or more (whether consecutively or across a school year), the LA has a duty to make alternative arrangements, as the pupil is unlikely to receive a suitable education in a mainstream school. Please refer to the WLP policy for Children who have health needs and cannot attend school.

Admissions

Admissions will be managed in line with the school's Admissions Policy.

No child will be denied admission to the school or prevented from taking up a school place because arrangements for their medical condition have not been made; a child may only be refused admission if it would be detrimental to the health of the child to admit them into the school setting.

The school will not ask, or use any supplementary forms that ask, for details about a child's medical condition during the admission process.

Notification procedure

When the school is notified that a pupil has a medical condition that requires additional support the school will arrange a meeting with parents, healthcare professionals and the pupil, with a view to discussing the necessity of an IHP (outlined in detail in the [IHPs](#) section of this policy).

The school will not wait for a formal diagnosis before providing support to pupils. Where a pupil's medical condition is unclear, or where there is a difference of opinion concerning what support is required, a judgement will be made by the headteacher based on all available evidence (including medical evidence and consultation with parents).

For a pupil starting at the school in September, arrangements will be put in place prior to their start date. This will include full consideration of information provided by the child's previous school. Where a pupil joins the school mid-term or a new diagnosis is received, arrangements will be put in place within two weeks of the child being added to the school role.

Staff training and support

Any staff member providing support to a pupil with medical conditions will receive suitable training. Staff will not undertake healthcare procedures or administer medication without appropriate training. Training needs will be assessed by the school nurse through the development and review of IHPs, on a **termly** basis for all school staff, and when a new staff member arrives. The school nurse will confirm the proficiency of staff in performing medical procedures or providing medication. Staff will be provided with the required PPE, when necessary.

A first-aid certificate will not constitute appropriate training for supporting pupils with medical conditions.

Through training, staff will have the requisite competency and confidence to support pupils with medical conditions and fulfil the requirements set out in IHPs. Staff will understand the medical conditions they are asked to support, their implications, and any preventative measures that must be taken.

Whole-school awareness training will be carried out on a **termly** basis for all staff and included in the induction of new staff members.

The school nurse will identify suitable training opportunities that ensure all medical conditions affecting pupils in the school are fully understood, and that staff can recognise difficulties and act quickly in emergency situations.

Training will be commissioned by the headteacher and provided by the following bodies:

- **Commercial training provider, including online.**
- **The school nurse.**
- **GP consultant**
- **The parents of pupils with medical conditions**

The parents of pupils with medical conditions will be consulted for specific advice and their views are sought where necessary, but they will not be used as a sole trainer.

The governing board will provide details of further CPD opportunities for staff regarding

supporting pupils with medical conditions.

Self-management

Following discussion with parents, pupils who are competent to manage their own health needs and medicines will be encouraged to take responsibility for self-managing their medicines and procedures. This will be reflected in their IHP.

Where possible, pupils will be allowed to carry their own medicines and relevant devices. Where it is not possible for pupils to carry their own medicines or devices, they will be held in suitable locations that can be accessed quickly and easily. If a pupil refuses to take medicine or carry out a necessary procedure, staff will not force them to do so. Instead, the procedure agreed in the pupil's IHP will be followed. Following such an event, parents will be informed so that alternative options can be considered.

If a pupil with a controlled drug passes it to another child for use, this is an offence and appropriate disciplinary action will be taken in accordance with our Drug and Alcohol Policy.

Supply teachers

Supply teachers will be:

- Provided with access to this policy.
- Informed of all relevant medical conditions of pupils in the class they are providing cover for.
- Covered under the school's insurance arrangements.

Individual Healthcare Plans (IHPs)

The school, healthcare professionals and parents agree, based on evidence, whether an IHP will be required for a pupil, or whether it would be inappropriate or disproportionate to their level of need. If no consensus can be reached, the headteacher will make the final decision.

The school, parents and a relevant healthcare professional will work in partnership to create and review IHPs. Where appropriate, the pupil will also be involved in the process.

IHPs will include the following information:

- The medical condition, along with its triggers, symptoms, signs, and treatments.
- The pupil's needs, including medication (dosages, side effects and storage), other treatments, facilities, equipment, access to food and drink (where this is used to manage a condition), dietary requirements, and environmental issues.
- The support needed for the pupil's educational, social, and emotional needs.
- The level of support needed, including in emergencies.
- Whether a child can self-manage their medication.
- Who will provide the necessary support, including details of the expectations of the role and the training needs required, as well as who will confirm the supporting staff member's proficiency to carry out the role effectively?
- Cover arrangements for when the named supporting staff member is unavailable.
- Who needs to be made aware of the pupil's condition and the support required?

- Arrangements for obtaining written permission from parents and the headteacher for medicine to be administered by school staff or self-administered by the pupil.
- Separate arrangements or procedures required during school trips and activities.
- Where confidentiality issues are raised by the parents or pupil, the designated individual to be entrusted with information about the pupil's medical condition.
- What to do in an emergency, including contact details and contingency arrangements.

Where a pupil has an emergency healthcare plan prepared by their lead clinician, this will be used to inform the IHP.

IHPs will be easily accessible to those who need to refer to them, but confidentiality will be preserved. IHPs will be reviewed on at least an annual basis, or when a child's medical circumstances change, whichever is sooner.

Where a pupil has an EHC plan, the IHP will be linked to it or become part of it. Where a child has SEND but does not have a statement or EHC plan, their SEND will be referenced in their IHP.

Where a child is returning from a period of hospital education, alternative provision or home tuition, the school will work with the LA and education provider to ensure that their IHP identifies the support the child will need to reintegrate.

Managing medicines

In accordance with the school's Administering Medication Policy, medicines will only be administered at school when it would be detrimental to a pupil's health or school attendance not to do so.

Pupils under 16 years old will not be given prescription or non-prescription medicines without their parents' written consent, except where the medicine has been prescribed to the pupil without the parents' knowledge. In such cases, the school will encourage the pupil to involve their parents, while respecting their right to confidentiality.

Non-prescription medicines may be administered in the following situations:

- When it would be detrimental to the pupil's health not to do so
- When instructed by a medical professional.

No pupil under the age of 16 will be given medicine containing aspirin unless prescribed by a doctor. Pain relief medicines will not be administered without first checking when the previous dose was taken, and the maximum dosage allowed. Parents will be informed any time medication is administered that is not agreed in an IHP.

The school will only accept medicines that are in-date, labelled, in their original container, and contain instructions for administration, dosage and storage. The only exception to this is insulin, which must still be in-date, but is available in an insulin pen or pump, rather than its original container.

All medicines will be stored safely and in line with medical guidance. Pupils will be informed where their medicines are at all times and will be able to access them immediately, whether in school or attending a school trip or residential visit. Where relevant, pupils will be informed of who holds the key to the relevant storage facility. When medicines are no longer required, they will be returned to parents for safe disposal.

Sharps boxes will be used for the disposal of needles and other sharps.

Controlled drugs will be stored in a non-portable container and only named staff members will have access; however, these drugs can be easily accessed in an emergency. A record will be kept of the number of controlled drugs held and any doses administered. Staff may administer a controlled drug to a pupil for whom it has been prescribed, in accordance with the prescriber's instructions.

The school will hold asthma inhalers for emergency use. The inhalers will be stored in the medical room and their use will be recorded. Inhalers will be used in line with the school's Asthma Policy.

Records will be kept of all medicines administered to individual pupils, stating what, how and how much medicine was administered, when, and by whom. A record of side effects presented will also be held. The administration of medicines will always be witnessed, and counter signed on the administering medicines record sheet.

Allergens, anaphylaxis, and adrenaline auto-injectors (AAIs)

The school's Allergen and Anaphylaxis Policy is implemented consistently to ensure the safety of those with allergies.

Parents are required to provide the school with up-to-date information relating to their children's allergies, as well as the necessary action to be taken in the event of an allergic reaction, such as any medication required.

The headteacher and catering team will ensure that all pre-packed foods for direct sale (PPDS) made on the school site meet the requirements of Natasha's Law, i.e. the product displays the name of the food and a full, up-to-date ingredients list with allergens emphasised, e.g. in bold, italics or a different colour.

The catering team will also work with any external catering providers to ensure all requirements are met and that PPDS is labelled in line with **Natasha's Law**. Further information relating to how the school operates in line with Natasha's Law can be found in the Whole-School Food Policy.

Staff members receive appropriate training and support relevant to their level of responsibility, in order to assist pupils with managing their allergies.

The administration of adrenaline auto-injectors (AAIs) and the treatment of anaphylaxis will be carried out in accordance with the school's Allergen and Anaphylaxis Policy. Where a pupil has been prescribed an AAI, this will be written into their IHP.

A Register of Adrenaline Auto-Injectors (AAIs) will be kept of all the pupils who have been prescribed an AAI to use in the event of anaphylaxis. A copy of this will be held in each classroom for easy access in the event of an allergic reaction and will be checked as part of initiating the emergency response. Secondary pupils who have prescribed AAI devices can keep their device in their possession.

Primary pupils who have prescribed AAI devices, will have their medication stored in a suitably safe and central location; in this case, the **school office**. Regular checks will be made by staff to ensure AAI devices are in date. Where devices are found to be out of date, parents will be informed. However, the responsibility to provide in date AAI devices rests with the parents.

Designated staff members will be trained on how to administer an AAI, and the sequence of events to follow when doing so. AAIs will only be administered by these staff members. In the event of anaphylaxis, a designated staff member will be contacted. Where there is any delay in contacting designated staff members, or where delay could cause a fatality, the nearest staff member will administer the AAI. If necessary, other staff members may assist the designated staff members with administering AAIs, e.g. if the pupil needs restraining.

The school will keep a spare AAI for use in the event of an emergency, which will be checked on a **monthly** basis to ensure that it remains in date, and which will be replaced before the expiry date. The spare AAI will be stored in **the medical room**, ensuring that it is protected from direct sunlight and extreme temperatures. The spare AAI will only be administered to pupils at risk of anaphylaxis and where written parental consent has been gained. Where a pupil's prescribed AAI cannot be administered correctly and without delay, the spare will be used. Where a pupil who does not have a prescribed AAI appears to be having a severe allergic reaction, the emergency services will be contacted, and advice sought as to whether administration of the spare AAI is appropriate.

Where a pupil is, or appears to be, having a severe allergic reaction, the emergency services will be contacted even if an AAI device has already been administered.

In the event that an AAI is used, the pupil's parents will be notified that an AAI has been administered and informed whether this was the pupil's or the school's device. Where any AAIs are used, the following information will be recorded on the Adrenaline Auto-Injector (AAI) Record:

- Where and when the reaction took place
- How much medication was given and by whom.

AAIs will not be reused and will be disposed of according to manufacturer's guidelines following use.

In the event of a school trip, pupils at risk of anaphylaxis will have access to their AAI with and the school will give consideration to taking the spare AAI in case of an emergency.

Record keeping

Written records will be kept of all medicines administered to pupils. Proper record keeping will protect both staff and pupils and provide evidence that agreed procedures have been followed. Appropriate forms for record keeping can be found in [Appendix D](#) and [Appendix E](#) of this policy.

Emergency procedures

Medical emergencies will be dealt with under the school's emergency procedures.

Where an IHP is in place, it should detail:

- What constitutes an emergency.
- What to do in an emergency.

Pupils will be informed in general terms of what to do in an emergency, e.g. telling a teacher.

If a pupil needs to be taken to hospital, a member of staff will remain with the pupil until their parents arrive. When transporting pupils with medical conditions to medical facilities, staff members will be informed of the correct postcode and address for use in navigation systems.

Day trips, residential visits, and sporting activities

Pupils with medical conditions will be supported to participate in school trips, sporting activities and residential visits.

Prior to an activity taking place, the school will conduct a risk assessment to identify what reasonable adjustments should be taken to enable pupils with medical conditions to participate. In addition to a risk assessment, advice will be sought from pupils, parents, and relevant medical professionals. The school will arrange for adjustments to be made for all pupils to participate, except where evidence from a clinician, e.g. a GP, indicates that this is not possible.

Defibrillators

Schools have an automated external defibrillator (AED). The AED will be stored securely.

All staff members and pupils will be made aware of the AED's location and what to do in an emergency. A risk assessment regarding the storage and use of AEDs at the school will be carried out and reviewed **annually**.

No training will be needed to use the AED, as voice and/or visual prompts guide the

rescuer through the entire process from when the device is first switched on or opened; however, staff members will be trained in cardiopulmonary resuscitation (CPR), as this is an essential part of first aid and AED use.

The emergency services will always be called where an AED is used or requires using. Where possible, AEDs will be used in paediatric mode or with paediatric pads for pupils under the age of eight.

Maintenance checks will be undertaken on AEDs on a weekly basis by the school nurse, who will also keep an up-to-date record of all checks and maintenance work.

Unacceptable practice

The school will not:

- Assume that pupils with the same condition require the same treatment.
- Prevent pupils from easily accessing their inhalers and medication.
- Ignore the views of the pupil or their parents.
- Ignore medical evidence or opinion.
- Send pupils home frequently for reasons associated with their medical condition or prevent them from taking part in activities at school, including lunch times, unless this is specified in their IHP.
- Send an unwell pupil to the medical room or school office alone or with an unsuitable escort.
- Penalise pupils with medical conditions for their attendance record, where the absences relate to their condition.
- Make parents feel obliged or forced to visit the school to administer medication or provide medical support, including for toilet issues. The school will ensure that no parent is made to feel that they have to give up working because the school is unable to support their child's needs.
- Create barriers to pupils participating in school life, including school trips.
- Refuse to allow pupils to eat, drink or use the toilet when they need to in order to manage their condition.

Liability and indemnity

The governing board will ensure that appropriate insurance is in place to cover staff providing support to pupils with medical conditions.

The school holds an insurance policy covering liability relating to the administration of medication. In the event of a claim alleging negligence by a member of staff, civil actions are most likely to be brought against the school, not the individual.

Complaints

Parents or pupils wishing to make a complaint concerning the support provided to pupils with medical conditions are required to speak to the school in the first instance. If they are not satisfied with the school's response, they may make a formal complaint via the school's complaints procedures, as outlined in the Complaints Procedures Policy. If the

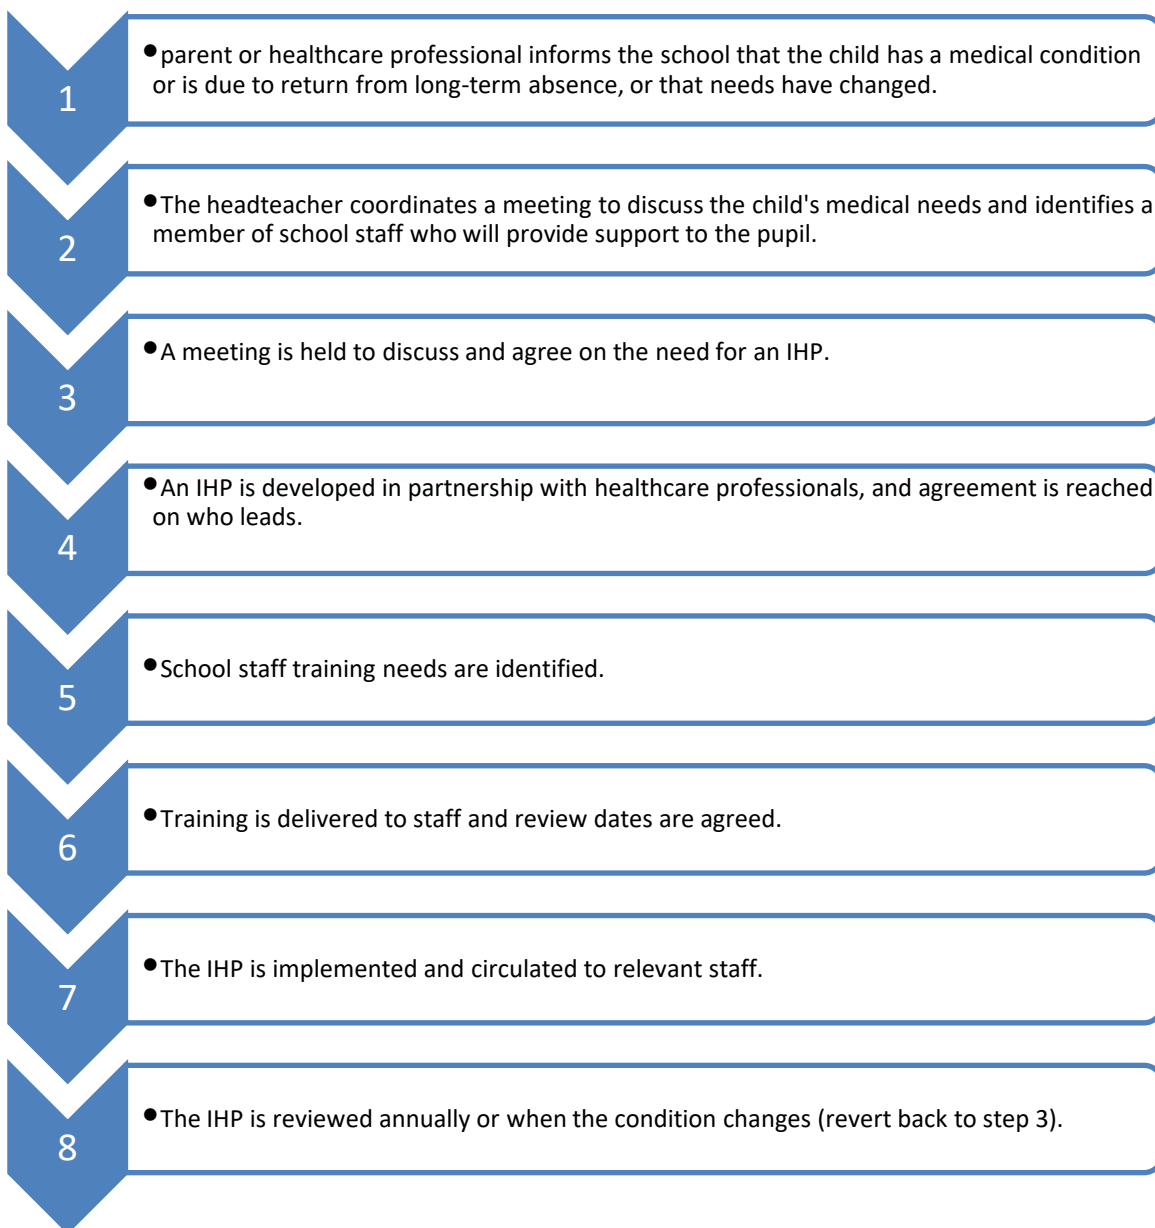

issue remains unresolved, the complainant has the right to make a formal complaint to the DfE.

Parents and pupils are free to take independent legal advice and bring formal proceedings if they consider they have legitimate grounds to do so.

Home-to-school transport

Arranging home-to-school transport for pupils with medical conditions is the responsibility of the LA. Where appropriate, the school will share relevant information to allow the LA to develop appropriate transport plans for pupils with life-threatening conditions.

RE: Developing an individual healthcare plan (IHP) for your child

Dear parent,

Thank you for informing us of your child's medical condition. I enclose a copy of the school's policy for supporting pupils at school with medical conditions for your information.

A central requirement of the policy is for an IHP to be prepared, setting out what support each pupil needs and how this will be provided. IHPs are developed in partnership with the school, parents, pupils (where appropriate), and the relevant healthcare professionals who can advise on your child's case. The aim is to ensure that we know how to support your child effectively and to provide clarity about what needs to be done, when and by whom.

Although IHPs are likely to be helpful in the majority of cases, it is possible that not all pupils will require one. We will need to make judgements about how your child's medical condition impacts their ability to participate fully in school life, and the level of detail within IHPs will depend on the complexity of their condition and the degree of support needed.

A meeting to start the process of developing your child's IHP has been scheduled for date. I hope that this is convenient for you and would be grateful if you could confirm whether you are able to attend or whether rescheduling is required. The meeting will include me (the headteacher), a relevant healthcare professional and the school nurse. Please let us know if you would like us to invite another medical practitioner, healthcare professional or specialist, and provide any other evidence you would like us to consider at the meeting as soon as possible.

If you are unable to attend, it would be helpful if you could complete the attached IHP template and return it to the school office, together with any relevant evidence, for consideration at the meeting.

[Attach appendix a, Individual Healthcare Plan, to this letter.]

I would be happy for you contact me via email address or phone number if this would be helpful.

Yours sincerely,

Name

Job

Appendix I: Incident Reporting Form

Date of incident	Time of incident	Place of incident	Name of ill or injured person	Details of the illness or injury	Was first aid administered? If so, give details	What happened to the person immediately afterwards?	Name of first aider	Signature of first aider
